

CLIFFORD M. VILLANOY

Software Quality Assurance Engineer | QA Automation Engineer

villanoy.clifford@gmail.com | +639287254908 | github.com/CliffordVillanoy | linkedin.com/in/clffmv

PROFESSIONAL EXPERIENCE

Software Quality Assurance Engineer

Yondu Inc. | Manila, Philippines | August 2024 – Present

- Participated in sprint planning with developers, solution architects, product owners, Scrum Masters, and designers, translating requirements and acceptance criteria into 50+ test cases to improve coverage across critical payment workflows.
- Validated payment reliability across five platforms — including a legacy business onboarding platform, NFC tap-to-pay, QR scan-to-pay, fund transfers, and payment alerts — across B2B and B2C systems by executing E2E testing on UI flows and APIs using Postman, while collaborating with senior developers on side-by-side database transaction validation for high-volume payment workflows.
- Identified and validated 30+ critical issues in high-risk payment flows before release, contributing to a 40% reduction in production bugs and improving release stability.
- Contributed to a data-driven automated regression suite in Katalon Studio alongside senior QA leads, covering 5+ payment modules by maintaining reusable test data and validation flows — reducing manual regression effort by 35% and improving release efficiency.
- Supported production releases by reproducing live issues in staging environments, identifying root causes, and escalating blockers to appropriate teams to minimize customer impact.
- Presented test results, defect impact, and release risks to technical and business stakeholders through sprint discussions and product demos, supporting informed prioritization and release readiness decisions.
- Mentored junior QA engineers on E2E workflows, legacy system integration across web and mobile platforms, and testing processes, strengthening team testing capability and delivery confidence.

Software Quality Assurance Engineer Intern

Highly Succeed Inc. | Manila, Philippines | August – November 2023

- Designed and executed 15+ functional test cases for a telemedicine platform across web and mobile applications, validating patient workflows and third-party integrations before release.
- Performed cross-platform testing on iOS and Android devices, documenting reproducible defects that improved debugging efficiency and reduced development turnaround time.

Software Quality Assurance Engineer Intern

Cobra Itech Services Corporation | Manila, Philippines | April – July 2023

- Validated financial calculations in a budget calculator application through functional testing, ensuring calculation accuracy and expected business behavior.
- Tracked defects from discovery through verification and conducted post-deployment sanity testing to reduce recurring production issues.

EDUCATION

Bachelor of Science in Information Technology | Specialization: Web & Mobile Application Development | FEU Institute of Technology, Metro Manila | February 2024

CERTIFICATIONS

- ISTQB Certified Tester – Foundation Level (CTFL) | Issued March 2026
- Anthropic AI Fluency: Framework & Foundations | Issued September 2025
- Katalon Practitioner Level | Issued September 2025
- IT Specialist – Database | Issued July 2021

PROJECTS

CURA Playwright Framework

GitHub: <https://github.com/CliffordVillanoy/cura-playwright-framework>

- Built a scalable E2E automation framework using Playwright, TypeScript, and POM architecture for maintainable testing.
- Developed modular test components page objects, utilities and structured data to support scalable automated execution.
- Configured automated execution, assertions, and reporting workflows to improve test reliability and debugging.
- Applied automation best practices selectors, waits, fixtures, and data-driven test design to ensure reliable and maintainable tests.

TECHNICAL SKILLS

Automation & QA Tools: Katalon Studio • Playwright • Cypress • Selenium WebDriver • Postman • JMeter • Jira • TestRail

Programming & Query Languages: Python • TypeScript • JavaScript • Java • SQL

Testing Expertise: Functional Testing • API Testing • Regression Testing • End-to-End Testing • Cross-Platform Testing (iOS, Android, Web) • Performance Testing • Sanity Testing

Development & Collaboration Tools: Git • GitHub • Figma • Miro • Notion • NotebookLM
