Professional Experience

Software Quality Assurance Engineer Bonifacio Global City, Taguig City, Philippines
Yondu Inc. **August 2024 – Present**

- Validated end-to-end fintech transaction workflows across B2B and B2C systems, ensuring data integrity and supporting stable releases across 26 Agile sprints, reducing post-release defects and minimizing transaction failures.
- Executed functional, regression, RESTful API, and end-to-end testing of financial workflows, validating endpoints using Postman, identifying defects early and ensuring accurate transaction processing, supporting reliable system integrations and data consistency.
- Validated and managed 30+ defects in Jira and verified fixes through sanity and post-deployment testing, improving turnaround time and release readiness, reducing production risk, and supporting overall system stability.
- Designed and maintained 50+ test cases and regression suites aligned with business requirements, increasing test coverage, reducing regression gaps, and improving reliability of critical transaction workflows.
- Developed and executed automated regression tests for 5+ modules using Katalon Studio, collaborating with senior QA engineers to improve test efficiency and reduce manual effort, enabling faster, more reliable release cycles.

Software Quality Assurance Engineer Intern Mandaluyong City, Philippines
Highly Succeed Inc. **August 2023 – November 2023**

- Designed and executed 10+ functional test cases, validating application features and ensuring alignment with business requirements, supporting reliable releases and reducing the risk of production defects.
- Developed and executed test cases for a telemedicine web and mobile application, validating business logic and end-to-end workflows, improving system reliability and reducing user-impacting issues.

Software Quality Assurance Engineer Intern Quezon City, Philippines
Cobra Itech Services Corporation **April 2023 – July 2023**

- Developed and executed 10+ test cases for a budget calculator module, validating business logic and inputs to ensure accurate calculations and reduce the risk of errors.
- Reported and verified defects during testing cycles, supporting regression validation, reducing production defects, and improving overall release stability.

Education

FEU Institute of Technology Morayta, Metro Manila
Bachelor of Science in Information Technology with Specialization in Web and Mobile Application **February 2024**

Certifications

- **ISTQB Certified Tester – Foundation Level (CTFL)** Issued March 2026
- **Katalon Practitioner Level** Issued September 2025
- **IT Specialist – HTML, CSS** Issued March 2023
- **IT Specialist – Database** Issued July 2021

Skills and Tools

Testing & Automation Tools: Katalon Studio (hands-on), Selenium WebDriver (basic), Cypress (basic), Playwright (ongoing), Postman, Jira, TestRail, JMeter
Testing Practices: Functional Testing, Regression Testing, API Testing, Sanity Testing, End-to-End Testing, Test Case Design, Test Execution, Test Automation Concepts
Programming Languages: Python, Java, JavaScript
Database: MySQL
Development Tools & IDEs: VS Code, IntelliJ IDEA, Eclipse
Collaboration & Productivity Tools: Figma, Miro, Notion, NotebookLM
